# About Us

The music school is one of India's finest music schools, providing professional education in the field of electronic music. We are the first school in India that offers experience-based learning, and with our extensive network of channel partners, students will not only study in the classroom but will also apply their knowledge in the internship programs offered at TMS.

**Founded by Clement Dsouza in 2015**, The Music's'cool has been esteemed, reliable and noteworthy.

Our goal is to deliver high-quality education through a structured procedure that will prepare students to be successful professionals at the conclusion of the course.

Created by **Clement Dsouza**, who brings two decades of experience in the industry. Deejaying was not a popular art form when Clement began his career, but he took to it quite effortlessly. It all began with turntables and experimenting with various genres. He was skilled at sensing the mood of his audience and swiftly adapting to provide exactly what they required.

Clement comes from a time when he observed the evolution of technology. Today's technology is being improved or updated, but the complete transition from turntables to digital occurred during his time, and he observed this dramatic shift. When we see a DJ nowadays, we don't realize how much work made them the experts they are.

This is why he decided to establish The Music'Scool. His efforts should serve as a lesson for future generations. His goal is to deliver high-quality education through a structured procedure that will prepare students to be successful professionals after the course. The curriculum that we have created is the result of almost two decades of expertise.

# Courses We Offer
